

FDC® Unit Connector Panel, ST® Compatible Adapters

6-in, 6 F, Single-mode (OS2)

CORNING

Corning Cable Systems offers a variety of panels and modules for use in the FDC® unit family of products. The panels are used with field-installable connectors or in applications where the preconnectorized cables are routed directly to the FDC unit housing. Both the panels and the modules may be equipped with 900 µm single-fiber or ribbon-fiber pigtails for pigtail splicing. Panels and modules are available with a variety of connector types. Plastic modules include molded-in areas for coiling fiber slack and protecting the minimum bend-radius of the fiber.

Features and Benefits

Compatible with Corning Cable Systems Fiber Distribution Centers (FDC®)

Reduced inventory complexity

Termination of interbuilding backbone cables at main or intermediate cross-connect

Variety of deployment options

Modules accommodate various fiber and connector types

Flexibility of deployment

Fiber routing and bend-radius protection designed into modules

Clean and easily accessible fiber routing with fewer breaks
