

Model 33-WAP-SKIN

Vanity Cover (SKIN) for WAPs

Oberon's 33-WAP-SKIN allows you to customize the appearance of the popular Cisco and other enterprise wireless access points. The SKIN is made from an RF transparent plastic, and can be attached directly to the Cisco enterprise wireless access points. The 33-WAP-SKIN is paintable so you can customize the color of the access point to partially conceal the access point or compliment interior color schemes. Coloring the SKIN does not void the manufacturer's warranty.

Oberon Model 33-WAP-SKIN shown with Cisco 3700 wireless access point (not included)

Specifications:

- Vanity cover for wireless access points with dimension 9" x 9" x 2" or smaller
