SNAP-IN FILLER PANEL

Application

The 34537-Series and 34538-Series Snap-In Filler Panels shown in the table below can be used in any CPI cabinet with rail spacing for standard 19" panel-width equipment and with square holes on the mounting flanges.

(Snap-In filler panels do not fit equipment mounting rails with tapped holes rather than square holes on mounting flanges.)

Snap-In Filler Panels

PART NO.		DESCRIPTION[1]	PACKAGE OF
BLACK	GLACIER WHITE		
34537-000	34537-E00	19" W x 1 RMU	1 Each

[1] RMU = Rack Mount Unit = U = 1.75 inch (44.45 mm)

Tools Required

No tools required. Filler panels snap into square holes on both ends.

Installation and Removal

Press both ends of filler panel into square holes on mounting flanges of equipment mounting rails. Filler panel snaps into place on both ends.

To remove, use handle in recesses toward ends of filler panel to grab and pull both ends straight out.

1 RMU and 2 RMU snap-in filler panels

installed in equipment mounting rails
