

J-HOOKS – Cable management that’s fast and secure.

J-Hooks provide an easy-to-install, non-continuous cable support for all types of telecommunication, data and power cabling. They also are perfect for low voltage building management and fire protection cabling.

Our CJ Series is engineered to provide stress-free cable support for multiple cables and features a structural design for optimal strength and tapered edges to reduce cable sheath damage. Multiple pre-drilled holes reduce on-site modification at installation. J-Hooks can be attached to a variety of structures and are available with multiple attachment options that allow quick and easy cable installation virtually anywhere.

The CJHP Series J-Hooks are plastic coated and feature a built in latch that allows you to lock the bendable flap into place – up to 50 times with no signs of metal fatigue. CJHP hooks combine the best features of both metal and plastic, providing strength and a slick, no-bur surface to make pulling cable easy. All CJHP hooks are plenum safe.

FEATURES

- Broad product line
- Sturdy steel construction
- Smooth tapered edges
- UL load tested
- Simple one person installation
- Engineered for the future
- RoHS compliant
- Recyclable and produced with over 30% recycled steel
- No bonding/grounding needed
- Meets TIA-568-C & TIA 569-C and complies with EN 50174-2

BENEFITS

- CJ hooks are available in ¼” to 4” sizes with multiple attachment options; CJHP hooks are available in 1” to 3” sizes with two attachment options
- Provides optimal support for electrical and high-performance data cables (Including Cat 5e, Cat 5, Cat 6A, Cat 7, and fiber optic)
- Reduces pressure points for ultimate cable protection
- cULus listed
- Labor savings
- Accommodates future emerging data cables
- Environmentally friendly
- Great for the environment
- Cost savings
- Ensures that software and applications running on the network are able to perform as designed and work seamlessly together

COMPLIANCE
