

4IN RAPIDRUN OPTICAL HDMI MALE FLYING LEAD TX

2212-60130-001 | [Quiktron](#)

FEATURES & BENEFITS

RapidRun Optical is designed to be the standard for in-wall HDMI audio/video installations. Using pre-terminated break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations. Ideal for high resolution displays utilizing HDMI, this flying lead allows for an extremely clean finish with little to no cable clutter at the source.

- Supports full 1080p, 4k, 3D HDMI features up to 1000 feet which meet and exceed today's HDMI requirements
- Utilizes fiber cabling, so no need to worry about EMI/RFI interference that is present in copper cabling
- Powered with USB at the display side, which allows the source side to be clean of excess cables
